

RAHUL RAJPUROHIT

Java Backend Developer

+91 9537554081 @ rahulrajpurohit680@gmail.com LinkedIn Surat, Gujarat

SUMMARY

I am a Java Backend Developer with hands-on experience in building backend applications and microservices. I possess a strong understanding of Object-Oriented Programming, Data Structures, and database management using Oracle SQL and MySQL. I am skilled in API development, database integration, and tools like Docker, Maven, and Kafka, while also having a solid grasp of frontend technologies such as ReactJS. My goal is to build robust and efficient backend systems

EXPERIENCE

Associate Software Engineer

Agivant Technologies

01/2026

Client: TigerGraph

- Enhanced query cache performance in TigerGraph-based backend workflows, achieving 2.1x faster response time through tuning and performance improvements
- Implemented REST APIs using Java and Spring Boot for backend services with database integration
- Engineered microservices architecture with Docker-based deployments, Kafka messaging workflows, and backend system debugging
- Contributed to improving backend application lifecycle and distributed system workflows

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Indian Institute Of Information Technology Ranchi

08/2020 - 06/2024 Ranchi, Jharkhand

Intermediate Education

Shiv Jyoti Senior Secondary School (C.B.S.E)

01/2020 - 12/2020 Rajasthan

Secondary Education

Ryan International School (C.B.S.E)

01/2018 - 12/2018 Gujarat

SKILLS

Gmail Java SpringBoot REST

OOP Data Structures Oracle SQL

Docker Maven GitHub Kafka

Microservices React HTML

CSS JavaScript Caching SQL

Java Spring SpringMVC

SpringDataJPA Hibernate JDBC

JWT SDLC WebSockets Gps

Modular MVC Python

OpenCV

PROJECTS

Real-Time TGSRTC Transit System

01/2025 - 12/2025

Real-time TGSRTC Transit System built using Java, Spring Boot, React, Leaflet, and WebSockets

- Built a real-time bus tracking system using Spring Boot and React
- Implemented WebSocket-based live GPS updates for real-time tracking
- Integrated Leaflet maps for route visualization and live movement tracking
- Designed a crowdsourced tracking system using passenger location sharing

Employee Management System

01/2024 - 12/2024

Employee management system using Java, Spring Boot, Spring Data JPA, and REST API

- Implemented REST APIs for employee CRUD operations
- Streamlined database interactions using Spring Data JPA
- Designed modular MVC architecture for scalability and maintainability

PROJECTS

Image Classification using CNN

📅 01/2023 - 12/2023

Image classification project using Python, Machine Learning, and OpenCV

- Built a CNN-based image classification model achieving 94% accuracy using OpenCV preprocessing and dataset augmentation techniques
- Preprocessed image datasets and improved training performance
- Streamlined model training workflow to enhance accuracy and efficiency
