

RAHUL RAJPUROHIT

Java Backend Developer

+91 9537554081 @ rahulrajpurohit680@gmail.com LinkedIn Surat, Gujarat

SUMMARY

I am a Java Backend Developer with hands-on experience in building backend applications and microservices utilizing Java, Spring Boot, and REST APIs. My strong grasp of Object-Oriented Programming, coupled with my proficiency in database management using Oracle SQL and MySQL, enables me to develop efficient solutions. I am adept in API development, database integration, and familiar with tools like Docker and Kafka, as well as various frontend technologies

EXPERIENCE

Associate Software Engineer

Agivant Technologies

01/2026

Client: TigerGraph

- Improved query cache performance in TigerGraph-based backend workflows, achieving 2.1x faster response time through optimization techniques
- Developed REST APIs using Java and Spring Boot for backend services with database integration
- Worked on Microservices architecture, Docker-based deployments, Kafka messaging workflows, and backend system debugging
- Contributed to understanding and improving backend application lifecycle and distributed system workflows

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Indian Institute Of Information Technology Ranchi

08/2020 - 06/2024 Ranchi, Jharkhand

Intermediate Education

Shiv Jyoti Senior Secondary School (C.B.S.E)

01/2020 - 01/2020 Rajasthan

Secondary Education

Ryan International School (C.B.S.E)

01/2018 - 01/2018 Gujarat

SKILLS

Gmail Java SpringBoot REST

OOP Data Structures Oracle SQL

Docker Maven GitHub Kafka

Microservices React HTML

CSS JavaScript Caching SQL

Java Spring SpringMVC

SpringDataJPA Hibernate JDBC

JWT SDLC WebSockets Gps

Modular MVC Python

OpenCV

PROJECTS

Real-Time TGSRTC Transit System

01/2025 - 01/2025

A project to enhance public transport efficiency

- Developed a real-time bus tracking system using Spring Boot and React
- Implemented WebSocket-based live GPS updates for real-time location tracking
- Integrated Leaflet maps for route visualization and live bus movement tracking
- Built a crowdsourced tracking approach using passenger location sharing

Employee Management System

01/2024 - 01/2024

An enterprise-level application for managing employee data

- Developed RESTful APIs to automate employee CRUD operations
- Integrated Spring Data JPA for efficient database management and reduced boilerplate code
- Designed a modular MVC architecture for maintainability and scalability

PROJECTS

Image Classification using CNN

📅 01/2023 - 01/2023

A machine learning project focused on image classification

- Built a CNN-based image classification model achieving 94% accuracy using OpenCV-based preprocessing and dataset augmentation
- Performed image preprocessing and dataset augmentation using OpenCV
- Optimized training workflow to improve model performance and processing speed
